

ASAD ALI

Data Analyst • Machine Learning

0308-3975181 • asad.ds026@gmail.com • [linkedin.com/in/asad-ali-02006ds](https://www.linkedin.com/in/asad-ali-02006ds) • Khanewal, Punjab, Pakistan

PROFESSIONAL SUMMARY

Data Science graduate with hands-on experience building end-to-end ML pipelines and Power BI dashboards. Delivered classification models achieving up to 93% accuracy and 96% precision across behavioral, retail, and sales datasets. Proficient in Python, SQL, Scikit-learn, XGBoost, and Power BI with strong foundations in data preprocessing, feature engineering, EDA, and model evaluation. Experienced in automating operational data workflows that improve efficiency and eliminate manual bottlenecks.

TECHNICAL SKILLS

ML & Data Science: Scikit-learn, XGBoost, Random Forest, Logistic Regression, NLTK, TF-IDF, Feature Engineering, EDA, Model Evaluation, Cross-Validation

Programming & Tools: Python, SQL (JOINS, CTEs, Aggregations), Power BI (DAX), Pandas, NumPy, Matplotlib, Seaborn, Excel (Advanced, VLOOKUP, Pivot Tables), Git, Jupyter

Core Concepts: Classification, Regression, NLP, Data Preprocessing, Hyperparameter Tuning, Pipeline Automation

MACHINE LEARNING PROJECTS

Mental Health Risk Prediction | *Python · Scikit-learn · Ensemble Methods · Power BI*

- Built end-to-end ML pipeline covering data wrangling, EDA, feature engineering, normalization, model training, and evaluation on behavioral and social factor datasets.
- Ensemble method outperformed all individual classifiers — **93% accuracy and 96% precision**; designed Power BI dashboard to communicate risk insights to non-technical stakeholders.

Retail Profit & Loss Detection System | *Python · XGBoost · Logistic Regression · Decision Tree*

- Developed end-to-end predictive pipeline to detect retail profit/loss patterns; benchmarked XGBoost against Logistic Regression and Decision Tree across all pipeline stages.
- XGBoost achieved **91% accuracy and 92% recall** — recall prioritized as the key metric to minimize undetected loss cases.

Sales Performance Dashboard — Bike Purchase Analysis | *Power BI · DAX · SQL · Python*

- Analyzed purchase patterns across income, gender, education, occupation, home ownership, and regional dimensions using SQL and Python-based EDA.
- Delivered interactive Power BI dashboard with drill-down filters; identified high-income, home-owning customers as top purchase segment to drive targeting decisions.

PROFESSIONAL EXPERIENCE

Data Management Officer • *Daewoo Waste Management Company*

Mar 2025 – Apr 2026

- Automated daily and monthly invoice generation based on worker attendance, machinery deployment, penalties, and complaint metrics — achieving **100% invoice accuracy** and eliminating all processing delays.
- Designed automated reporting workflows that improved operational efficiency by **60%**, reducing manual data-entry bottlenecks using advanced Excel (VLOOKUP, pivot tables, complex formulas).
- Maintained and validated high-volume operational records; prepared structured reports supporting data-driven management decisions.

EDUCATION

BS in Data Science • Islamia University Bahawalpur, Punjab

Feb 2022 – Feb 2026

CERTIFICATIONS

Google Data Analytics Professional Certificate — Coursera / Google · 2024

Data Manipulation with Pandas — DataCamp · 2024
